

All volunteers who plan to help at school this year must be registered online. After Sept. 1 only registered volunteers will be permitted to volunteer in school. If you registered last spring or over the summer, please DO NOT register again.

To register, volunteers should go to the district website, www.thompsonschoools.org and click on "Volunteer Registration" listed under "Quick Links" on the home page. The registration process is easy and takes less than five minutes. Volunteers will be instructed to create a Username (we suggest using your e-mail address) and Password. Be sure to remember both!

Once registered, volunteers do not need to re-register when their students move up to middle or high school or if their volunteer information changes. Volunteers can update their profiles at any time by logging on to the district website, www.thompsonschoools.org and then choosing Parent (or Community) > Volunteer from the drop-down menu on the home page. Choose "Update your Profile" from the box on the VITAL page. Log in using the User Name and Password originally set up and then choose from the list shown to make the appropriate changes. Be sure to save the changes.
